FROM THE PEOPLE

MR. STRAIN QUESTIONED.

The statement in your paper Saturday evening from Mr. Vert regarding the right use to be made of the proceeds from the last three library balls is heartily endorsed by very many of the women of Pendleton who worked for their success. I was a member of the board at that time also, when we voted Oct. 7th, 1914, unanimously that this fund be set aside for a "Library Building Fund" for the new county library we were contemplating.

I notice in C. P. Strain's published statements the inference that it was more economical for the city to run its library separately during the years 1909 to 1913. As I was one of the first members of the board appointed by the city council in 1909 and served for nearly six years, I believe that I can tell one of the reasons why it was so "economical." My remembrance is that for several of those years not one cent of city library funds was spent for books but the board had to rely on the women of Pendleton to raise the money to buy books with. As books are the basis of a library's equipment, this shows that the "economy" cry is not a matter that can be referred to with any pride in a publicly supported institution, when it was left to the women to largely finance it.

Here is a quotation from a letter of Strain's dated April 11, 1915, to a member of the library building committee. The letter is on file with the library records. "I happened to glance through my library accounts yesterday and when I counted up nearly \$3000 that had been raised by the club women of Pendleton and the library ball and turned over to the library, I resolved that I would do anything that prudently and justly can be done to bring this whole affair to a satisfactory consummation."

Now I learn that over \$4000 has actually been raised by the women of Pendleton for the library and so would like to ask C. P. Strain for the following figures:

1.—Give exact amounts received each year from 1909 to date from the library balls.

2.—Give itemized statement for each of these years of all expenditures from this source, showing to whom bills were paid and for what material or service.

3.—Give exact amounts received each year from 1909 to date from different women's clubs who solicited or earned funds for library purposes. Give name of organization which gave each amount.

4.—Give itemized statement for each year of all expenditures from these sources, showing to whom bills were paid and for what material or service.

I presume that having been county assessor for thirteen years and treasurer of the library board for eight years, his experience in accurately keeping public accounts will allow him to reply at once and clearly on these points.

Mr. Strain was asked by the present board to make a statement for the city council last week on CITY library expenses and I notice that about half of the published report was on a different subject—his prediction that the COUNTY LIBRARY system would fail, though it looks like anything but a failure to the rest of us.

Therefore I would like to ask Mr. Strain to confine his answer in this case to the four questions asked here, leaving out the subject of "taxation" as irrelevant in this connection.

HELEN W. ROBINSON.

EXPLAINS BALL FUND REPORT.

To the Honorable Mayor and Council. Gentlemen: We can not advise you definitely how much money will be needed by the Pendleton Public Library for the ensuing year. There is now on hand \$1908.79 of the city funds which was derived from the 1915 tax levy. There yet remains to be turned over by the county treasurer the collections received from the last half of the taxes which is \$1280.37 making a total of \$3189.16 library funds available for future use. (Official figures.) We also have \$298.19 in the Ball fund.

The above is that portion of the report of the Library Board to the city council relating to the Ball fund to which Mrs. Vert referred in her letter of the 14th inst.
